

## **Instructions for accessing the full text of electronic resources available at the Aristotle University of Thessaloniki.**

You can access the full text of electronic resources (books, journals, articles, PhD theses, etc) available at the Aristotle University of Thessaloniki, either by using computers connected to the university network or by using AUTH Virtual Private Network (VPN), which allows users to be identified as university members, wherever they are.

### **AUTH Virtual Private Network – VPN**

The service allows users to access the University resources outside the campus by recognizing the IP address of their computer as a university one, and thus giving access to all the services available at the University.

To have an internet connection.

For more detailed information about the service, visit the IT Center of AUTH at the following address ( <https://it.auth.gr/el/netAccess/VPN> ).
