Images: Team Byron

The **Laboratory of Narrative Research** is a recently founded research and teaching unit that is part of the School of English at Aristotle University of Thessaloniki, Greece. It brings together scholars and researchers with special interest in the exploration of narrative border crossings between literary traditions, modes of writing, theories, media, disciplines, histories, cultures, classes and age-groups. In this context, it fosters interdisciplinary collaborations across a variety of fields in the humanities and (social) sciences, it supports undergraduate and postgraduate teaching and actively promotes the creation of contact zones between the academic community and wider social networks.
